

VICTORIA

QUARTERLY ABSTRACT OF STATISTICS

No. 34 — JUNE, 1955

Issued under the authority of the Honorable
the Chief Secretary

by

V. H. ARNOLD F.I.A.
Government Statist

By Authority :
W. M. HOUSTON, Government Printer, Melbourne.

Copies may be obtained at the Office of the Government Statist,
Melbourne.

INTRODUCTION.

Victoria is situated at the south-eastern extremity of the Australian continent of which it occupies about a thirty-fourth part, and contains about 87,884 square miles. It lies approximately between the 34th and 39th parallels of south latitude and the 141st and 150th meridians of east longitude. Its greatest length from east to west is about 493 miles, its greatest breadth about 290 miles and its extent of coast-line (including the length around Port Phillip Bay, Western Port, and Corner Inlet) 980 miles. It is bounded on the north and north-east by New South Wales from which it is separated by the River Murray and by a straight line in a south-easterly direction from a place near the head-waters of that stream, called The Springs, to Cape Howe. On the west it is bounded by South Australia and on the south and south-east its shores are washed by the Southern Ocean, Bass Strait, and the Pacific Ocean.

The climate of Victoria is characterized by warm summers, rather cold winters, and rain in all months. Mean temperatures in midsummer (January) range from 65 deg. (Fahr.) in the south to 75 deg. (Fahr.) in the north-west, corresponding means of daily maxima being 80 deg. (Fahr.) in the south and 90 deg. (Fahr.) in the north-west. In midwinter (July) the mean temperature is generally below 50 deg. (Fahr.), mean of the night minima being below 40 deg. (Fahr.).

ACKNOWLEDGMENT.

Much of the information in this "Abstract" is obtained from the Commonwealth Statistician and other authorities. Acknowledgment with thanks is made to all those responsible for the furnishing of these particulars.

Note.—The above index has been computed by the Commonwealth Statistician.

MELBOURNE WHOLESALE PRICE INDEX-NUMBERS.

The index of wholesale prices was first computed by the Commonwealth Statistician in 1912 and relates chiefly to basic materials and foods weighted in accordance with consumption in the years immediately preceding that date. Neither the component items nor the weighting have been varied. Consequently the index is a measure of changes in wholesale price levels based on usages which have altered substantially since the period on which the weighting was determined. As such it is useful as an indication of long-term trends on the assumption that the relative importance of component items remained constant. But it no longer serves as a measure of price variations from month to month or from year to year of commodities weighted in accordance with present-day consumption. A table relating to this index for varying periods from 1861 to 1950 is shown in issue No. 26 (March, 1953) of this publication. Particulars for subsequent years may be found in the "Labour Report" issued annually by the Commonwealth Statistician.

WHOLESALE PRICE INDEX-NUMBERS—BASIC MATERIALS AND FOODSTUFFS.

Following a conference of Statisticians in 1930 an index by the Commonwealth Statistician has been computed from new data on prices and consumption. Both in contents and method of computation it differs from the Melbourne Index of Wholesale Prices referred to in the previous paragraph. The price quotations have in the main been obtained directly from manufacturers and merchants, and, with a few important exceptions, from Melbourne sources. Apart from home-produced building materials and one or two minor commodities, however, the price movements may be taken as representative of fluctuations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on average annual consumption during the years 1928-29 to 1934-35 inclusive.

(Base: Average 3 years ended June, 1939 = 100.)

(a) Excluding age and invalid pensioners in benevolent institutions.

(b) During 1939-40 all invalid pensions in force were specially reviewed and, at 30th June, 1940, all those pensioners who had become qualified for age pensions by age and residence were transferred to the age pensions list.

(c) Commenced from 1st July, 1942. Particulars exclude pensions payable to widows in benevolent institutions.

(d) The income restrictions imposed in 1931 and 1932 and modified in 1934, 1936, and 1937 were abolished as from 1st July, 1943.

(e) Not available.

(f) Commenced from 1st July, 1941. Particulars exclude endowed children in approved institutions.

(g) As from 20th June, 1950, endowment became payable in respect of all children under sixteen years of age in a family.

Note.—"Added Value" is the source from which provision is made for the following:—salaries and wages, depreciation, taxation, rent, insurance, miscellaneous expenses and profits.

VICTORIA—VALUE OF RECORDED PRODUCTION, 1953-54.

Industry.	Gross Value of Production. (a)	Marketing Costs.	Value at Place of Production.	Costs of Production. (b)	Net Value of Production.	Net Value per Head of Population.
	£'000	£'000	£'000	£'000	£'000	£ s. d.
Primary—						
Agriculture	89,374	14,587	74,787	9,163	65,624	27 1 8
Pastoral	123,226	9,972	113,254	4,324	108,930	44 10 2
Dairying	57,730	2,178	55,552	9,350	46,202	19 1 5
Poultry and Bee Farming	22,170	1,691	20,479	6,086	14,393	5 18 10
Trapping, Forestry, and Fisheries	13,403	1,047	12,356	..	12,356	5 2 0
Mining	10,317	988	9,329	2,052	7,277	3 0 1
Total Primary	316,220	30,463	285,757	30,975	254,782	105 3 2
Manufacturing (d)	408,314	..	408,314	..	408,314	168 10 6
Total all Industries	724,534	30,463	694,071	30,975	663,096	273 13 8

(a) Gross value is defined as the value of recorded production at the wholesale price realized in the principal markets. In cases where primary products are absorbed locally, or where they become raw material for secondary industry, these points are presumed to be the principal markets.

(b) Costs of production include stock feed, seed costs and pickling, manures, spraying, sheep and cattle dips, power, fuel, water, and all other materials used in production, but exclude depreciation, wages and maintenance costs.

(c) Not available.

(d) Manufacturing is included at its net added value because the gross or wholesale selling value contains so much duplication of products, the finished article of one class of manufacture forming in numerous cases the raw material for others.
